Automatic and flexible discovery of Konica Minolta devices

Compact Size

With a small footprint nearly half of A3 MFPs and a total height of only 550mm, the Bizhub C35 can be placed almost anywhere in the office, including a desktop. This is especially ideal for SMEs or whichever office trying to handle space constraint.

All-in-One Design

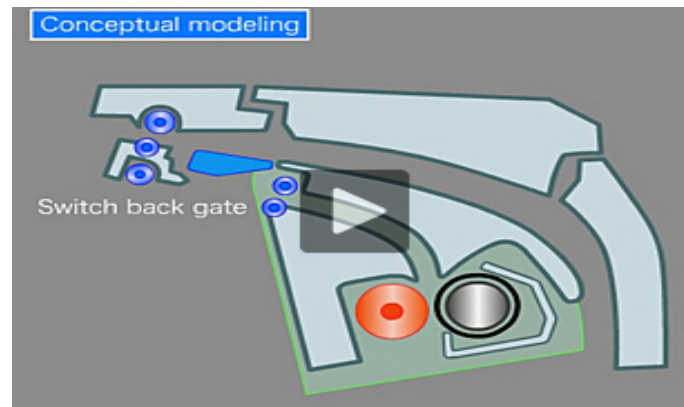

The bizhub C35 has all the essential features needed as a distributed MFP for large offices. In addition to standard Super G3 faxing, network printing, and network scanning and copying functions, the C35 also provides a host of other standard features including a variety of security functions, RADF (reverse automatic document feeder), duplex printing, and a 120GB HDD.

Large 4.3-inch full colour LCD touch-screen display

Classic white-line designed paired with bright LEDs that can be easily located across the office. Bizhub C35 is extremely simple to operate with an easy-to-see 32,000-colour high-resolution LCD display, easy-to-use large buttons, and icons that are understandable at a glance.

High Level Productivity

Bizhub C35 offers high-speed outputs of 30 pages per minute (A4) albeit Black & white or color printing. It also provides 100% productivity for duplex printing. The C35's multi-access feature allows simultaneous scanning and printing for increased efficiency. Furthermore, the 1,350-sheet 2 large-capacity paper supply reduces the downtime needed for paper replacements, and the standard 60~210 g/m2 paper cassette accommodates a large variety of paper weights, even for duplex printing projects. 1. Excludes mixed colour and black & white documents. 2. 1,350 sheets max., when using two optional PF-P08 paper cassettes.

PageScope Mobile

The PageScope Mobile Application will definitely change your work style in no time. This application allows C35 to connect to Apple's devices (such as iPhone, iPod touch, iPad) letting you browse, read and order prints of documents conveniently. Also, loading of scanned data can be done via the Bizhub system.
