Washupito's Tiendita

Bizhub C280

Features

• Color: 28 PPM

• B&W: 28 PPM

• Max Monthly Volume: 75,000 Pages Max Paper Capacity: 3,650 Sheet High-speed, High Image Quality Output

• Upgraded Emperon Print System

• Large-Capacity Paper Supply and Varied Paper Compatibility* Max Paper Capacity: 3,650

Sheet High-speed, High Image Quality Output Max Paper Capacity: 3,650 Sheet High-speed, High Image Quality Output

• Supported Long Length paper*

• Professional and Versatile Finishing*

• PageScope Direct Print

• ICC Profile supported

• NEW Fiery Image Controller IC-412* * Optional

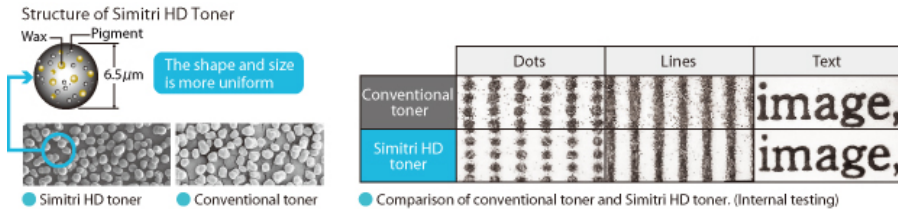

Intro

With Bizhub C280, using of color documents and presentation isn't only for large cooperate now. This compact, easy to use and affordable copier works at incredibly high speed of 28ppm in both black & white

and color. This copier also increases work efficiency while lowering the total cost of ownership, especially in communication costs, and fits perfectly into SOHO, mid-size offices, or wherever space is a consideration.

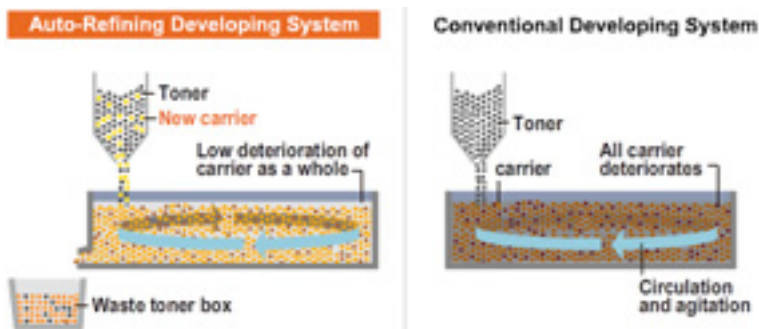

Technology

Simitri HD Toner

Bizhub C280's proprietary Simitri HD toner particles are minute in shape, ensuring sharp reproduction of fine text as well as colour uniformity. Long-term document storage is assured since the toner is optimized for resistance to fading and peeling.

Auto-Refining Developing System

Carrier in the black developing unit is supplied as toner is consumed. This ensures toner freshness for lasting high quality of B&W output.

New brush-type paper dust cleaning mechanism

New paper dust cleaning mechanism employs a brush to clean the scanner slit glass. Previous models cleaned the slit glass with a scraper. Uneven pressure applied to the edge of this scraper resulted in inconsistent cleaning results. The C280 series uses a cleaning brush with a large contact surface to ensure better removal of paper dust, which can cause striped copies if it accumulates on the slit glass. This improvement provides reliable scanning quality that is not dependent on paper path conditions or paper type.

Security

Non-contact IC Card Authentication

Users no longer have to worry about unauthorised access and information leakage. Introducing the Non-IC card Authentication which allows fast authentication users. No burden will be added to the users since pre-existing employee ID cards can be used to authenticate entry into certain rooms or floors for an even higher level of security. *Optional AU-201 Authentication Unit is required.

Productivity

Large-capacity Paper Supply and Varied Paper Compatibility

Process a huge volume of different documents on various paper types, from postcard to A3 Wide, at weights from 60 to 271 g/m². Also save time on paper restocking with large Paper Feed Cabinets that raise paper capacity to 3,650 sheets. The unit supplies paper when trays run empty, automatically switching trays* to ensure continuous paper feeding. * Paper must be the same size and orientation. Trays must be preset as auto select trays.

- **C360: 36 ppm colour, 36 ppm B/W**
- **C280: 28 ppm colour, 28 ppm B/W**
- **C220: 22 ppm colour, 22 ppm B/W**
- **FCOT:**
 - C360/C280 5.8 sec. or less (B/W)**
7.7 sec. or less (colour)
 - C220 7.5 sec. or less (B/W)**
11 sec. or less (colour)
- **Warm-Up Time** (main power on / subpower off)
 - C360/C280 27 sec. (B/W) / 35 sec. (colour)**
 - C220 22 sec. (B/W) / 27 sec. (colour)**

Â

Reduce downtime for operations

Enhance productivity with rapid output speed for colour as well as monochrome documents. This is possible due to tandem system arrangement of four developer units in a row, so all four colours can be developed almost simultaneously. The system also improves working efficiency by reducing warm-up time, first copy output time (FCOT) and downtime. Moreover, quick scanning can convert an enormous volume of documents into electronic data thanks to the high-speed ADF (Automatic Document Feeder).

Universal Design

Â

The bizhub C280 is specially designed for easy operation with high-contrast indications, large buttons, variable-angle LCD, and a new, simplified, control panel. The sharp, crisp display has clear explanations pertaining to several functions. Also, the control panel features Arrow Menu keys, which reduce the number of buttons for simpler operability, and the new Flippable One-Touch key menu accommodates more One-Touch keys in a smaller space.

The two-tone earth colour of this practical design makes output pages easier to see. The highly functional and compact design of the Bizhub C280 helps minimized set-up space which is ideal for in-office placement.
