Bizhub C360

Intro

With Bizhub C360, using of color documents and presentation isn't only for large cooperate now.This compact, easy to use and affordable copier works at incredibly high speed of 36ppm in both black & white and color.This copier also increases work efficiency while lowering the total cost of ownership, especially in communication costs, and fits perfectly into SOHO, mid-size offices, or wherever space is a consideration.

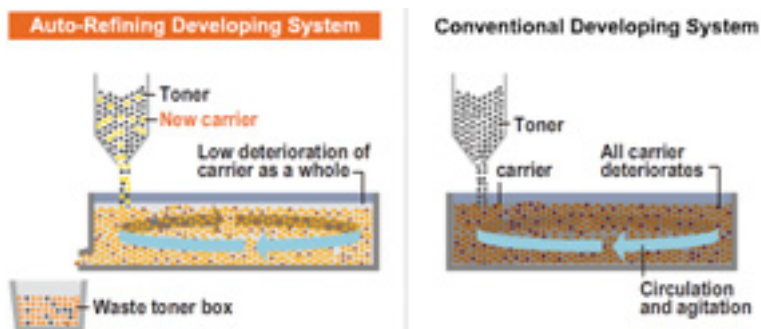

Technology

Simitri HD Toner

Konica Minolta's proprietary Simitri HD toner particles are small and even in shape, ensuring sharp reproduction of fine text as well as colour uniformity. Resistance to fading and peeling is optimised for long-term document storage.

Auto-Refining Developing System

Carrier in the black developing unit is supplied as toner is consumed. This ensures toner freshness for lasting high quality of B&W output.

New brush-type paper dust cleaning mechanism

New paper dust cleaning mechanism employs a brush to clean the scanner slit glass. Previous models cleaned the slit glass with a scraper. Uneven pressure applied to the edge of this scraper resulted in inconsistent cleaning results. The C360 series uses a cleaning brush with a large contact surface to ensure better removal of paper dust, which can cause striped copies if it accumulates on the slit glass. This improvement provides reliable scanning quality that is not dependent on paper path conditions or paper type.

Security

Non-contact IC Card Authentication

This method quickly authenticates users. And since pre-existing employee ID cards can also be used, there is no added burden on the user. IC cards can also be used to authenticate entry into certain rooms or floors for an even higher level of security. *Optional AU-201 Authentication Unit is required.

Network utilisation

The Bizhub C360 has a built-in infrastructure that allows connection of network around world. With the next-generation technology, the copier acts as a hub of network that seamlessly integrate Internet and Intranet functionality. Hence, information can be conveniently sent or retrieved without leaving your office.

Universal Design

The bizhub is packed with features that make accessibility easier for everyone. The front variable LCD panel touch screen is large and touch button can be zoomed to facilitate easy operation and reading for anyone. The sharp, crisp display has clear explanations pertaining to several functions. Also, the control panel features Arrow Menu keys, which reduce the number of buttons for simpler operability, and the new Flippable One-Touch key menu accommodates more One-Touch keys in a smaller space.

The two-tone earth colour of this practical design makes output pages easier to see. The highly functional and compact design of the bizhub C280 helps keep set-up space to a minimum for ideal in-office placement.
