Bizhub C452

Main Features

Intro

bizhub C452 is a more advanced and sophisticated version of our well-received bizhub C550. This brand new successor offers major development in terms of hardware facilities, security, media capabilities, print quality and eco-friendliness. The new high volume colour MFP has much to offer to large workgroups and busy departments in office environments and central reproduction departments (CRDs).

Digital information continues to bring ground-breaking changes to business workflow. bizhub C452 offers many solutions in print management, sharing data with fast, flexible scanning and distribution workflow, and even cost saving fax management solutions. Not only that, the high end device adds powerful, scalable options for colour management, auto finishing, high-volume fax and more. This machine also comes with simple touch-screen operation, superior security protection, seamless network integration and streamlined productivity.

High Productivity

Outstanding Quality Output & Productivity

The new model bizhub C452 can accommodate a printing speed (Colour: 45 ppm, B/W: 45 ppm) into our extensive range of products. Not only that, as a vendor who has an history of being innovative, this model is the first in the 45 ppm colour multifunctional printer that offers the popular feature in the lower speed bizhub color MFP – banner printing*! Print-on-demand on large marketing materials is no longer an expensive avenue.

Refill your paper supply less often on your bizhub C452 with a maximum paper capacity of 6,650 sheets (with options). Standard paper capacity is 3,650 sheets. The copier printer also comes with a reversing automatic document feeder that holds up to 100 sheets and can feed at speeds up to 78 opm for color and B&W. Simitri Toner

Intuitive Design

Viewing files saved in the Box is easier and more efficient on the control panel as thumbnails for simple file recognition.

^

Security

For this new bizhub model C552, it allows for multi purposed IC cards*** to be used to access data in highsecurity areas as well as synched operation with room entry and exit management. Another alternative way is to use improved finger vein authentication**** which is more accurate. Its ergonomic and efficient shape blends in with the design of the MFP.

Working in conjunction with finger-vein and IC card authentication, our easy-to-use ID & Print feature provides customers with a secure printing environment too. Just by using your finger, printing can automatically begin.

This saves the hassle to enter a password.

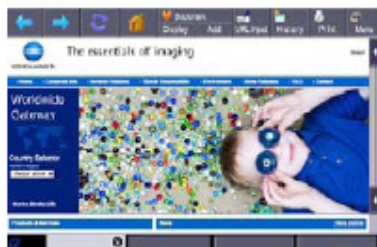

bizhub C552's Copy Guard**** prevents unauthorised copies from being made on the machine. The Password Copy feature allows protection to be cancelled by entering a password before attempting to re-copy the document.

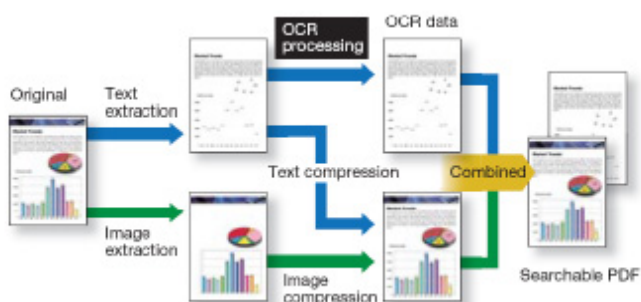

Solutions

Scanning to me and Scanning to Home are simple and useful security features since user authentication can be set which allow administrators to limit or disable any scan and send traffic outside of these ranges, effectively restricting where scans can be sent.

i-Option helps customers to enhance your bizhub's capabilities by offering greater convenience and customisation. bizhub's control panel can be used as a general purpose Web browser. Image Panel function divides the control panel into three areas – input, edit and output which allows customisation accordingly thus improving workflow.

New Searchable PDF** is perfect for quickly finding text in large documents, or to cut and paste text from a Searchable PDF to create new documents.

* Banner printing

** Requires optional i-Option LK-105 (available soon) and upgrade kit UK-203

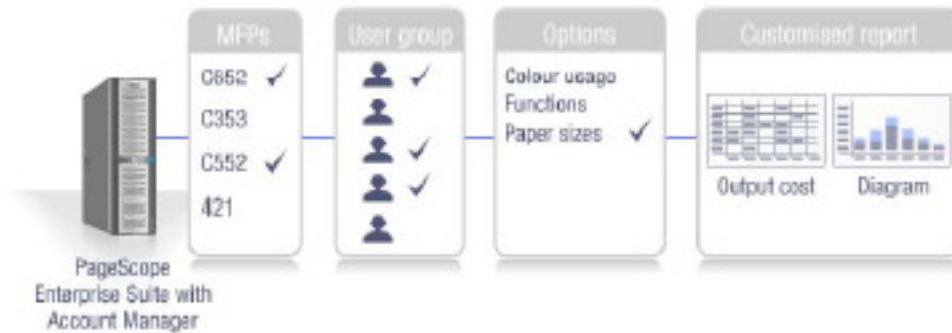

*** Optional Authentication Unit AU-201 required
 **** Optional Authentication Unit AU-102 required.
 ***** Optional Security Kit SC-507 is required.

PageScope

Setup, manage and control

Enhances work-flow, improves device administration, simplifies daily business requirements

- **Box Operator** for easy access to personal and public box files
 - **Workware** for simple processing of scanned documents such as merging, converting and forwarding
 - **Web Connection** for machine status reading and setup via web browser
 - **Data Administrator** for convenient central user administration/account control
- PageScope Enterprise Suite**
- **Central monitoring and administration of all output devices**
 - **Easy and secure access to users, accounts and profiles**
 - **Cost control and rights administration for users and output devices**

PageScope Account Manager
 Counter collection and output reporting

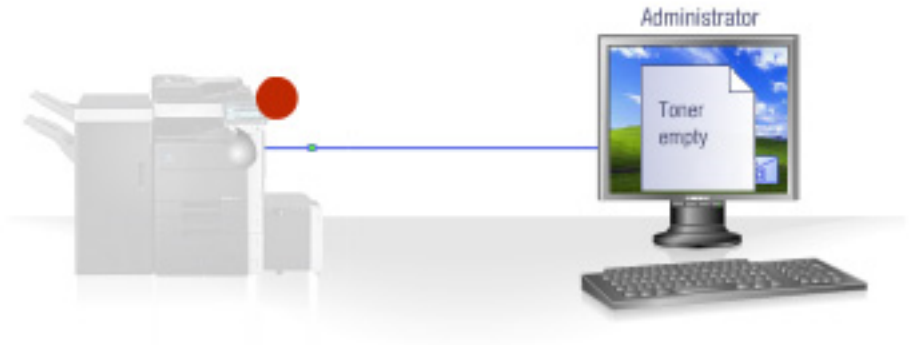

PageScope Authentication Manager
 Dynamic database for central user and rights management

PageScope Net Care Device Manager

Device monitoring & management

- Automatic e-mail alerts (paper jam, toner empty, devices offline)
- or subscribe to our free CS Remote Care

PageScope MyPanel Manager

Individual display settings and address books

Creation of individual panel settings, e.g. language or colour

User Boxes personal, group and public

- Storing of copy, print, scan and fax files
- Full Colour Document thumbnail view
- Personal " Password protected box
- Group " Document team sharing
- Public " for e.g. forms, lists, reports
